Diagram segments
- Collaboration
- Content Conversion
- Images / Files management
- Equations editing
- Spelling / grammar checking
- **CKEditor 5 Ecosystem**
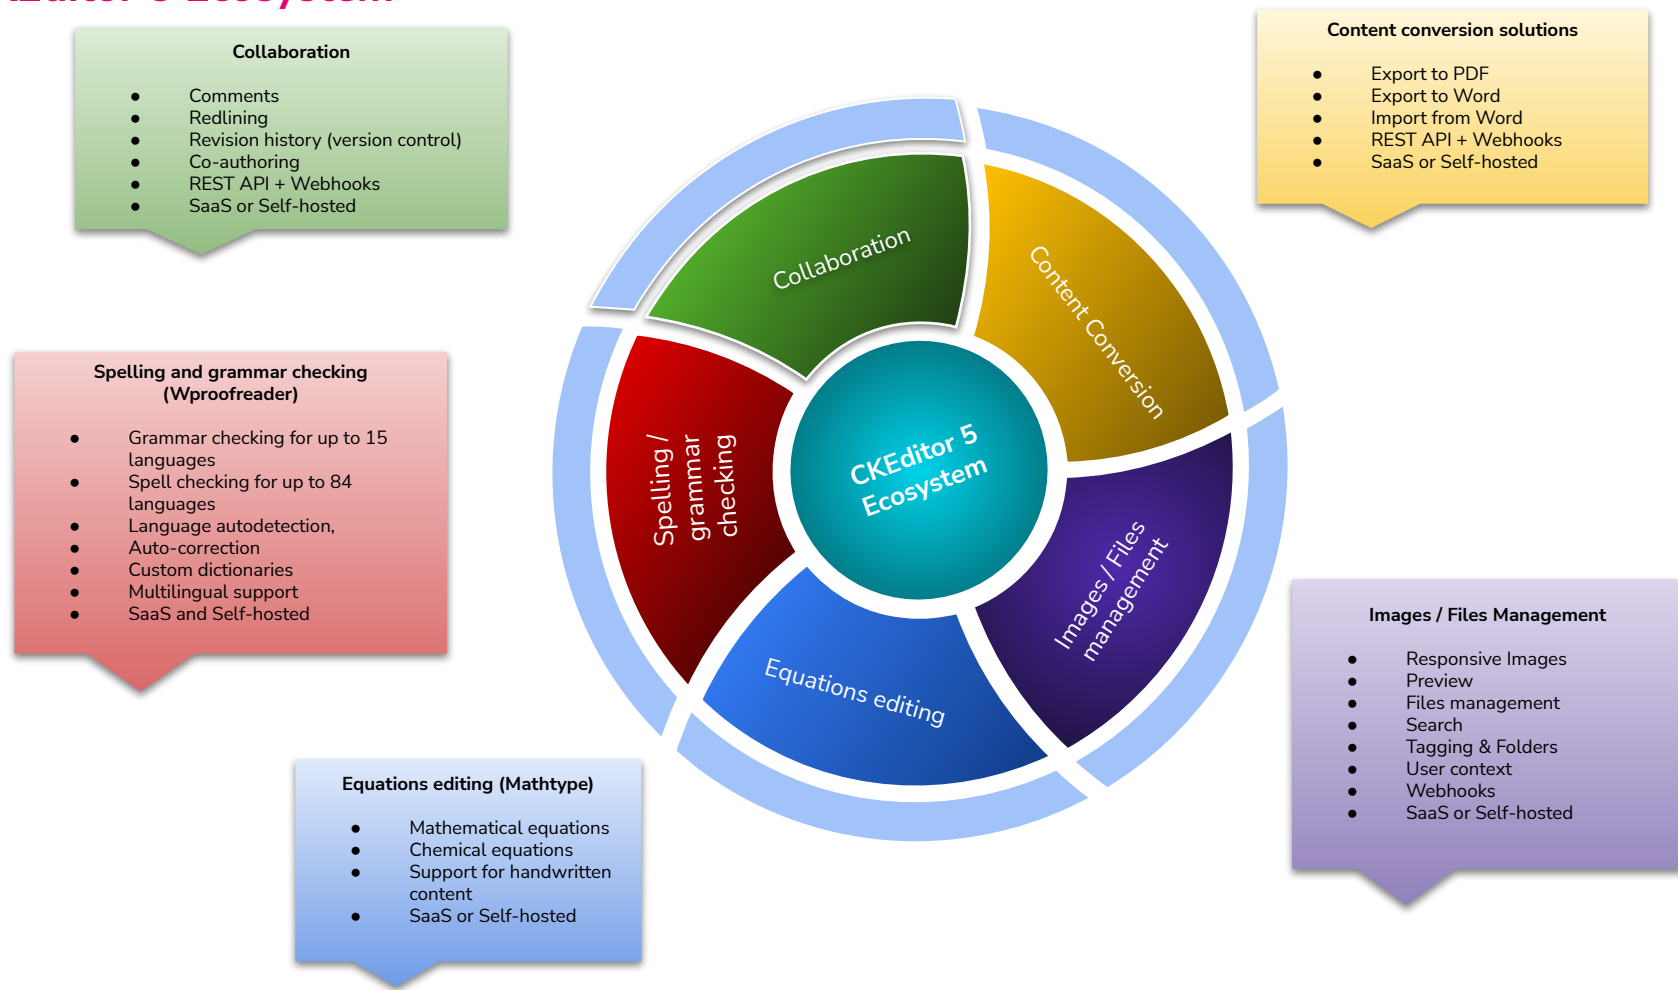

Benefits of Integrating CKEditor 5 within your project

- **Many standard [features](#) not available as standard features in other editors. To name a few**: Robust Tables and Images handling, Paste from Word / Google Docs, Drag and Drop, Auto-formatting, Automatic Text Transformations, Markdown-like editing, Find and Replace, Word and Character count API, Auto-linking, Restricted editing and many more.

- **Developer tools**:
    - [CKEditor 5 Inspector](#) (It allows you to observe changes to the data structures and the selection live in the editor, which is particularly helpful when developing new rich-text editor features or getting to understand the existing ones);
    - [CKEditor 5 Watchdog](#) (The watchdog utility allows you to do exactly that. It ensures that an editor instance is running, despite a potential crash. It works by detecting that an editor crashed, destroying it, and automatically creating a new instance of that editor with the content of the previous editor)

PROPOSAL

Option A: CKEditor 5 + Premium plugins

- Enterprise Internal CKEditor license for 1 software product (Application Name TDB) owned by Securities and Exchange Commission
- For up to 1 product
- **5 developers** covered by our support
- **Enterprise Standard** Support with **4** requests allowed / month

Products	Annual Fee per Product			
	1 sublicens/project			
CKEditor 5	$5,439			
Comments plugin	$2,175			
Track changes	$3,264			

Standard Enterprise Support (included by default in all options)

- Professional assistance delivered by Customer Care Team (all requests are served by our core developers and orchestrated by our Customer Care Leads).

- The base communication channel is email based through support@cksource.com because it's quite often necessary to share / review screenshots, error messages, code. From time to time, we're happy to setup a screen sharing call to address highest priority issues.

- Providing information in relation to the standard Software installation and configuration procedures.

- Providing information about using Software's default features, functions, APIs, etc.

- Providing information about content and use of Software's standard documentation.

- Bug reporting.

- Best practises sharing.

- 24 business hours for initial (human based) response time.
